

ADME PROFILING FOR OPTIMAL MOLECULE SELECTION

helping you de-risk development, optimize candidate selection, and accelerate timelines

Physicochemical properties

- Solubility
- Stability
- Log P/ log D
- Permeability (PAMPA, Caco-2, MDCK)

Drug metabolism

- Metabolic stability
- CYP & UGT phenotyping
- Metabolite ID
- Reactive metabolite trapping and characterisation

Drug-drug interaction

- CYP inhibition/induction
- Efflux transporter assays

Others

- Plasma protein binding
- Blood/plasma partitioning
- Stability
